

**EXAMPLE:**

A school's name would appear here.

## **2. VISION**

The South Dakota School District will prepare its students to graduate with the knowledge and skills necessary to excel in higher education and in careers with the confidence not only to dream, but to determine their futures.

As we advance through the 21st century, the challenge we face is to create an environment which prepares all of our students to successfully participate in a highly competitive society. We will cultivate an environment where technology is a part of the academic culture empowering students to meet state academic standards in all content areas using traditional and innovative technologies. We will develop independent life-long critical thinkers and learners who can communicate effectively, work collaboratively, and solve problems efficiently by using technology.
